Why should you do business with us?

- **WE** respond to the customer needs
- **WE** give you the option of learning as we are doing
- **WE** run and document projects based on a quantifiable (no guess work) assessment
- **WE** provide you a quicker **ROI - return on investment** - by utilizing proven Lean/Sigma strategies.

What **WE** have that others don't

LEAN & SIX SIGMA INTEGRATION WORKSHOP

WE have developed a workshop that actually helps you understand how, when, why and where to apply the LEAN/SIGMA tools within your organization.

Our workshop creates an understanding of how **ALL** the pieces of Lean & Six Sigma fit together to increase process flow, improved lead times, reduce costs, increase revenues; plus the order that they should be integrated into the change process.

The workshop is run on a forecast on a module to module basis, and at the end it is proven through implementing and tracking the proper improvement strategies that Lean/Sigma is much more effective overall than any other random improvements.

What else do **WE** provide?

WE offer a full range of consulting and training services, which spans from basic operational skills to management/leadership expertise.

Within Any Industry, Whether It Is Manufacturing, Service Or Non-Profit, There Are Numerous Opportunities For Training and Projects Centered On Continuous Process Improvement.

- Lean Enterprise Systems
- Lean Manufacturing
- Lean Management
- Lean Administration
- Management/Leadership Skills
- Facilitation Skills
